ABOUT ME

Tech is an exciting and ever growing industry that I love being part of. My curiosity and love for learning led me into tech and my people skills gave me the confidence to be able to work well in the teams present in the industry.

At Dev Academy, I was really able to foster my curiosity and improve my team skills, growing me into a confident junior dev. Key skills include having confronting conversations, how to approach difficult situations, learning to compromise in teams and finding ways to move forward better as a unit.

I want to improve and solidify my current skill set and grow into the new tools of the trade, especially new languages, JS frameworks and anything back-end related to grow into a full-stack roll in the future.

EXPERIENCE

Student at Dev Academy

March 2023 - July 2023

- Learnt to build projects using React, Redux and a Knex database in 9 weeks
- Worked in teams ranging from 3-5 with a variety of different people
- Experienced how to plan and develop a project from scratch combining different technologies
- Practiced pair programming with group mates to get multiple ideas on a problem
- How to compromise on design and tech decisions in a team focused project
- A huge emphasis was put on empathizing with others and coming to understand your own needs but also the needs of your team members

Desktop Platform Engineer intern

ACC | Wellington

Dec 2022 - Feb 2023

- With no experience, I quickly learned the Microsoft environment to help our staff work efficiently in their roles
- I worked as part of a team to solve issues that I wasn't confident in solving myself
- Guiding clients with various levels of tech literacy to dig deeper into issues and to help them solve them

Kitchen Hand

Sushi Bi | Wellington

2019 - 2021

- As a cashier, I acted as the face of the business and provided a pleasant experience for our customers
- My eye for detail was vital for cleaning the kitchen and our dishes
